Q&A

① some C++ code

```
for (int i = 1; i != 10; ++i)
    std::cout << i << ": hello , world!"
               << std::endl;
```

② and some Python...

```
for i in range(1,10):
    print i, "hello , world!"
```

What does it like?
